1. Claim 42 is objected to because of the following informalities: In claim 42, line 8, "of" should be deleted. Appropriate correction is required.

2. Claims 26-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites the limitation "the gain level" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim 35 recites the limitation "the gain level" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

OR

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

4. Claims 26, 27 and 33-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Iwamatsu or Koyama, both of applicant submitted prior art.

Iwamatsu discloses a negative-image signal processing apparatus having all the claimed features, including a sensor (10), an amplifier (15, 16) and processor (11) (see Figs. 1, 7, 10 and accompanying text).

Koyama discloses an image processing apparatus with variable clamping having a sensor (1), an amplifier (2) and processor (3) (see Figs. 1, 4 and accompanying text).
